

## QUICK RIFLE INFORMATION:

Information about the rifle events can be found by going to the green ribbons. Dates are listed in the schedule ribbon. Generally, all matches have a sign-up time which begins at 8AM with the event starting at 9AM. ***Please consult the club calendar on the web site for exact details.***

For the **silhouette matches** if you can arrive early to help set-up or stay a bit later to help tear down, that would be much appreciated.

The **100 yard bench rest and silhouette matches** are for .22's. Rifle classes for these can be found in 2019 rim-fire cast ribbon. For the **'cast bullet' bullseye** events, the same rules apply except, obviously, you use cast bullets. Most common are .30 calibers but many bottleneck and some straight wall pistol calibers are used. The bullets can be your castings or commercially purchased. The muzzle velocity really depends on the bullet composition as higher velocities tend to 'lead' the barrel. **Generally,** velocities should not exceed 2400 fps.

**The High Power rifle events are geared as NRA Across the Course Matches.** Details of these matches can be found by searching NRA High Power Rifle. A list rifles can be found in the NRA High Power rule book. Here is brief description of a match: [note: we shoot a 50 shot match with two sighting shots per string of fire]

The predominant American-style "High Power" match is a multi-position, multi-distance event. (This is commonly called "Across-the-Course" competition to distinguish it from prone-only High Power matches). It's important to understand the distinctive meaning of "High Power" as that term is applied to rifle matches. For more in depth information please click link below.

[NRA High Power Rule Book](#)

Most typically, American-style High Power competition means iron sights, three positions (standing, prone, and sitting OR kneeling), with both rapid-fire and slow-fire stages. This form of competition evolved from the U.S. Military's course of fire.

According to the NRA: "Four strings of fire are the basic building blocks of any NRA High Power rifle course of fire or tournament. These are:

1. Slow Fire, standing - 10 rounds at 200 yards in 10 minutes.
2. Rapid Fire, sitting or kneeling - 10 rounds at 200 yards in 60 seconds.
3. Rapid Fire, 10 rounds prone - 300 yards in 70 seconds.
4. Slow Fire, 10 rounds prone - 500 or 600 yards in 10 minutes.

Every NRA High Power Rifle match for which classification records are kept is a multiple or a combination of one or more of these strings. The popular National Match 50-shot Course, for instance, consists of 10 rounds slow fire standing; 10 rounds rapid fire sitting or kneeling; 10 rounds rapid fire prone and 20 rounds slow fire prone. The "Full Course" Match is an 80-round event with 20 rounds slow-fire standing; 20 rounds rapid-fire Sitting or kneeling; 20 rounds rapid prone; and 20 rounds slow fire prone. This total possible score is 800. This is the course of fire on which Carl Bernosky recently set a new record, scoring 800-42X.

Matches fired all at one distance and in one position are known as 'single-stage' matches and are usually 20-shot matches (2 times one of the basic strings).
